PROFESSIONAL EXPERIENCE

Co-founder / Game developer

CazaBros: Campina, Romania

November 2016-present

Job domain:
Company industry:
No. of employees:
Company description:

Game Development
Game Industry
2

Brother and sister got together to create fun games for everyone to enjoy. We both grew up with games and we want to give to others the experience of fun and interesting games that do more than just replicate what has come before.

Responsibilities:

Job description:

- Project Manager
- Game Design and Development (Unity 3D)
- C# Scripting for Unity 3D (Visual Studio)
- 3D Modeling, Texturing and Animation in Maya 2016
- 2D Graphics Manipulations, Character Creation and Animations (Photoshop and Unity)
- UI and UX design
- Sound effects, 8-bit music creation

Accomplishments:

We released 2 games so far. One of them Santa's Toy Workshop on Android, and another PainballPop on both Android and iOS platforms. We are currently working on a Google DayDream VR project, code-name: „Magic Garden”.

Software Developer

Croma Security Solutions Group PLC (CSSG): Whiteley, United Kingdom

March 2015-July 2016(1 year 5 month)

Job domain:
Company industry:
No. of employees:
Company description:

Biometric Security
Security and CCTV
100-200

Croma Security Solutions Group PLC is an AIM-quoted total security services provider. We are headquartered in Southampton and have four key divisions chaired by former Black Watch and Special Forces Officer Sebastian Morley, alongside CEO Roberto Michele Fiorentino, one of the UK's most prominent electronic security specialists.

Responsibilities:

Job description:

- multi-threaded WPF/C# application development; (tools: Visual Studio, Blend)
- C++ Dynamic-Linked Libraries development;
- Ruby on Rails application development;
- Designing, testing and debugging;
- Collaboration with the other developers, sales and marketing team to produce a sellable finalized product;

Accomplishments:

The Fastvein Time and Attendance system was the main project I developed while working at Croma with help from two intern web designers.

„Leveraging potent and yet flexible Vein Recognition hardware, and layering it onto a rich and intuitive suite of reporting tools, we have created a distinct leap forward in the world of attendance and people clocking, an invaluable asset for companies and individuals alike.” -- Fastvein™ T&A website

Oracle Application Developer

Asesoft International: Ploiesti, Romania

February.2014 – February.2015 (1 year)

Job domain: IT Software
Company industry: IT&C Software
No. of employees: 100
Company description:

ASESOFT INTERNATIONAL was established in 1997, as a private company with integral Romanian capital, and is now one of the most important players on the national IT market, due to its high professionalism towards partners and customers.

Responsibilities: Job description:

- development of information system projects, data management systems
- Oracle/SQL;
- development of applications combining Oracle, JavaScript, HTML,
- PL/SQL, jquery library;
- project analyses, design and database administration.
- creation of appropriate documentation for created applications

Accomplishments: I made web-based applications for Universitatea de Petrol si Gaze- Ploiesti. I worked on the project from the design phase of the requirements to creating the database, the server-side code (PL/SQL), and the user interface (Javascript/HTML).
